ABOUT ME

Full Stack Engineer with **2+** years of formal experience in product environments, building scalable web applications using Python, Django, Node.js, Express.js, React.js with additional experience in MySQL and GCP. Experienced in developing REST APIs, database-driven systems, large-dataset search features, backend optimization, and cloud-based application deployment. Passionate about building reliable, high-performance systems that scale.

SKILLS

Backend	Python - Node.js - Express.js - Django - RESTfull APIs - OOP - Authentication
Frontend	React.js - JavaScript - HTML/CSS - API Integration - State Handling
Databases	MySQL - Query Optimization - Indexing
Cloud & DevOps	GCP - Docker - Git (Version Control, Branching)
Others	System Design (HLD & LLD) - DSA - AI Tools (Claude AI & ChatGPT)

PROFESSIONAL EXPERIENCE

Software Engineer I [1.5 Year]

NOV 2024 – PRESENT

- Currently working on the “Young Professionals” platform, developing a scalable backend using **Python** (Django) and PostgreSQL with an API-first architecture, along with **React.js**-based frontend integration.
- Led backend development of Terrogece-Codex using CodeIgniter, MySQL, and GCP, improving system performance by ~35% through query optimization and indexing
- Designed scalable RESTful APIs using Django & **Node.js**, ensuring high performance, reliability, and efficient data handling.
- Leveraged Claude AI to accelerate development workflows (code review, API design, debugging), improving productivity.
- Implemented search, filtering, and admin workflows for large datasets and business use cases.
- Contributed to **GCP deployments**, code reviews, version control, and scalable development practices.

Software Engineer – Intern [6 Months]

MAY 2024 – NOV 2024

- Joined as Backend Intern after completing **full-stack training**, transitioning from **freelance** development to a full-time product engineering role.
- Contributed to the backend of Terrogece Codex project, initially assisting in feature development and bug fixes.
- Worked on real-time, database-driven web applications using Node.js, Python, PHP, JavaScript, and MySQL.
- Learned Git version control and applied best practices.

Freelance Full-stack Developer [4.4 Years]

FEB 2019 – JUN 2023

- Worked on small to mid-scale web tasks assigned through third-party developers, referrals, and professional contacts.
- Contributed to both frontend and backend development based on project needs, mainly using Node.js, Express.js, React.js, Python, Laravel, and basic Django.
- Assisted in building and updating REST APIs, fixing bugs, and implementing small features in existing applications.
- Performed basic database operations in MySQL, including simple queries, minor optimizations, and schema updates.

CERTIFICATIONS & TRAINING

Full Stack Development Training – Upskilling [6 Months]

JUL 2023 – JAN 2024

- Covered frontend (React.js) and backend (Node.js, RESTful APIs, databases) to strengthen full-stack development fundamentals.
- See certificate <https://trainings.internshala.com/certificate/view/nsdc/a0tkhzc513r/alnmbde840e/>

PROJECTS

E-commerce Platform Full Stack

- Built a full-stack multi-vendor eCommerce web application using **Node.js**, React.js, and MongoDB.
- Developed scalable REST APIs for seller onboarding, product management, cart, orders, and JWT-based authentication. Implemented complete buyer workflows along with admin-side inventory and order management.
- Integrated **Stripe** (test mode) for payment processing and deployed the application on Firebase and Netlify. Source code managed using GitHub.
- Live Demo: <https://myshopper-ff0dc.web.app/>

Social Media Platform Full Stack

- Developed a scalable full-stack social media platform inspired by Twitter/X using Node.js, **Express.js**, React.js, and MongoDB.
- Engineered RESTful APIs for **JWT**-based authentication, post creation, dynamic feed generation, user profiles, and social interactions (likes, comments, follow/unfollow).
- Designed and optimized MongoDB schemas and queries to efficiently handle high-read feed operations and large-scale user activity.
- Live Demo: <https://easytweet-d58c4.web.app/>

EDUCATION

Bengal College Of Engineering & Technology

B.Tech (ECE) | DGPA - 7.54

2014 – 2018

Durgapur, West Bengal
