ABOUT ME

Backend Engineer with **2+** years of formal experience in product environments, building scalable web applications using Python, Django with additional experience in MySQL, PostgreSQL, GraphQL and GCP . Experienced in developing REST APIs, database-driven systems, large-dataset search features, backend optimization, and application deployment. Passionate about building reliable, high-performance systems that scale.

SKILLS

Backend Stack : Python - Django - Javascript - Django REST Framework - GraphQL - OOP - ORM

Databases : MySQL - PostgreSQL - Redis(Caching)

Backend Engineering : RESTful APIs - JWT Authentication - API Design - Query Optimization - Indexing

Cloud & DevOps : GCP - Docker - Git (Version Control, Branching)

Computer Science Fundamentals : Data Structures & Algorithms (DSA) - System Design (HLD & LLD)

PROFESSIONAL EXPERIENCE

Software Engineer - I [2.2 Years]

MAY 2024 - PRESENT

- Joined as an Intern (May 2024–Nov 2024) and transitioned to a full-time role based on performance.
- Currently developing a scalable booking platform using Python (Django), PostgreSQL, GraphQL, Redis, and Celery, following modern backend architecture and best practices.
- Designed and developed scalable RESTful APIs, ensuring high performance, reliability, and efficient data handling.
- Implemented search, filtering, and admin workflows for large-scale, database-driven applications.
- Improved development velocity and code quality by integrating AI-assisted tools (Claude AI, GitHub Copilot) into the workflow for debugging, API design, and code reviews.
- Contributed to GCP deployments, code reviews, Git-based version control, and scalable backend practices.

Freelance Full-stack Developer [4.6 Years]

NOV 2018 - JUN 2023

- Delivered web development projects using Python, Django, Node.js, Express.js, Laravel, React.js, and MySQL through freelance engagements, collaborating with experienced developers and third-party development teams.
- Developed RESTful APIs, implemented new features, fixed production issues, and maintained database.

PROJECTS

Villa Booking Platform | Full-Stack Web Application

Tech Stack : Python, Django, GraphQL, PostgreSQL, Next.js, Render, Vercel

Live : <https://myvilla-frontend.vercel.app>

- Developed a production-ready full-stack villa booking platform using Django, GraphQL, PostgreSQL, and Next.js.
- Built secure GraphQL APIs for property listing, booking management, authentication, and user workflows.
- Implemented property listing, booking, search, filtering, and role-based access control with optimized queries.

B2B E-Commerce Platform | Full-Stack Web Application

Tech Stack : Python, Django, Redis, Celery, PostgreSQL, Next.js, Render, Vercel

Live : <https://nepa-unite-frontend.vercel.app>

- Developed a production-ready B2B e-commerce platform using Django, PostgreSQL, Redis, and Next.js with separate Admin (Seller Management) and Customer portals.
- Built complete order lifecycle, including order place, tracking, fulfillment, shipping, delivery, and payment workflows.
- Integrated Stripe Payment Gateway, Redis-based caching, and health monitoring to improve performance.

TaskBoard | Full-Stack Task Management Web Application

Tech Stack : FastAPI, GraphQL, Next.js, PostgreSQL, Vercel

Live : <https://taskboard-frontend-kohl.vercel.app>

- Built a production-ready task management platform using FastAPI, GraphQL, Next.js, and PostgreSQL with secure authentication, drag-and-drop Kanban boards, and project-based task organization.
- Implemented task prioritization, labels, real-time status tracking, dark/light theme support.

EDUCATION & TRAINING

Full Stack Web Development Training | Internshala Trainings

[6 Months]

JUL 2023 - JAN 2024

- Completed an intensive Full-Stack Web Development program with hands-on training in Python, Django, JavaScript, REST APIs, relational database design, Git, deployment, and building scalable web applications.

Bengal College Of Engineering & Technology

2014 - 2018

- B.Tech (ECE) | DGPA - 7.54

Durgapur, West Bengal
